

In our community KLOVE is the station of choice. Businesses frequently play it during the day, you can see car drivers singing the words as they pull up next to you, when kids come over they frequently comment that the same station is playing at their house. I very much appreciate the opportunity to play a radio station that I know will only be playing music that is fit for young minds and ears to be hearing, that is always encouraging its listeners to behave in a moral and neighborly way to others, that draws our community together as a well-behaved "family". I would not like that community/family feeling to be disrupted by a change in radio broadcasting. With so many difficulties assaulting families who are trying to raise productive and kind children, this radio station provides a wall of defense against those assaults. I strongly encourage you to continue to permit KLOVE and stations like it to occupy their current place in the radio world. Thank you, Don Crossfield
